GENERAL INSTRUCTIONS

Do not mow turf for two days before or after treatment. Repeat applications may be required to control some hard to kill weeds and these can be applied at 7-14 days.

GROUP I HERBICIDE

HERBICIDE RESISTANCE WARNING

Sportsground is a member of the Phenoxies group of herbicides. The product has the disruptors of plant cell growth mode of action. For weed resistance management Sportsground is a Group I herbicide. Some naturally occurring weed biotypes resistant to Sportsground and other Group I herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weeds population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Sportsground or other Group I herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Colin Campbell (Chemicals) Pty Ltd accepts no liability for any losses that may result from the failure of Sportsground to control resistant weeds.
